

# Stand 'N' Weld

A new era of pipe stands has just been introduced, boasting the innovative design of the Stand 'N' Weld fixed and - folding models, safeguarded by the cutting-edge Cougartron technology. These stands are conveniently delivered in parts to facilitate transport, promoting environmental sustainability, and can be effortlessly assembled in just five minutes.

Each package comprises the primary housing, a V-head, and a set of legs complete with nuts and bolts. Additionally, roller kits are readily available to accommodate any specific requests.

Fixed and foldable legs available. Our folding legs have the duty ratings you need to work on and compact storage when the day is done.

## FOLDING & FIXED STANDS

Max load of 1500 kg

Folding  
CW1000

Fixed  
CW1001

Adjustment screw

Nylon wear Surface

**Folding Pipestand 1500kg**

**Fixed Pipestand 1500kg**

Part nr.	CW1000	CW1001
Adjustable Height	85 cm -125 cm	85 cm -125 cm
Length	112 cm	76 cm
Weight	12,0 kg	11,5 kg

# Roller Kits

**Roller SS Ball** is ideal for use with threading machines, roll grooving, or other pipe working applications. Fits easily onto V Head Pipe Stands (CW1000 & CW100).

Our **Plastic Wheel Roller**, designed to provide robust support for a wide range of materials, including general-purpose and stainless steel, ensuring the prevention of workpiece contamination. All Roller Kits can be available per individual piece, but can be bought as a set. The Roller can be attached to the existing V head prongs and securely fastening in place with a locking screw. This versatile solution is ideal for both workshop and on-site applications, with a special emphasis on its suitability as a stand for precise pipe cutting using a circular saw.

Our **Steel Roller Head** features an individual piece, robust steel wheels that allow precise positioning adjustments of the pipe during cutting and welding operations (can be bought as a set as well). This versatile head is ideal for providing steadfast support to general-purpose materials. However, please note that it is not suitable for use with stainless steel, as contact with the steel wheels may risk material contamination. These plates seamlessly attach to the existing V head prongs and are securely fastened in place using a locking screw. This makes it an excellent choice for both workshop and on-site applications, making it particularly handy as a sturdy stand for cutting pipes with a circular saw.
